Figures 1 and 2 show the results of the regression analysis. The results indicate that the regression model is significant at the 0.05 level of significance. The adjusted R-squared value is 0.85, indicating that 85% of the variance in the dependent variable is explained by the independent variables. The results also indicate that the regression model is a good fit for the data, as the F-statistic is 10.12, which is greater than the critical value of 3.84 at the 0.05 level of significance. The results further indicate that the regression model is a good fit for the data, as the t-statistic is 3.12, which is greater than the critical value of 1.96 at the 0.05 level of significance.
